Summary

Bachelor of Technology (B.Tech) student in Computer Science with hands-on experience in software development, building backend services, and RESTful APIs using Node.js and Express.js. Strong foundation in data structures and algorithms. Experienced in designing modular backend systems, integrating third-party APIs, and writing clean, maintainable code. Participated in 15+ hackathons and developed 12+ real-world projects focused on solving practical problems through technology.

Skills

Programming: C++, JavaScript, SQL, Java
Frontend: React.js, TypeScript, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, RESTful APIs
Databases: MongoDB, MySQL, PostgreSQL
Tools & Cloud: Git, GitHub, Firebase, Docker, Postman, Google Cloud Platform (GCP), AWS (EC2, S3)
Core Concepts: Data Structures & Algorithms, Object Oriented Programming, DBMS, Operating Systems
Soft Skills: Adaptability, Teamwork, Problem-solving, Leadership

Projects

Assessment Platform | *React.js, Node.js, MySQL, Docker, Redis* [GitHub](#) **February 2026 – Present**

- Designed an assessment platform enabling real-time test execution and online proctoring with interactive monitoring dashboards.
- Implemented secure authentication and **RBAC** using **JWT** and **bcrypt**, along with bulk user provisioning through CSV upload and automated credential management.
- Optimized backend performance through **query tuning** and **Redis caching** to improve scalability and user experience.

Employee Leave Management | *MERN, Socket.IO, Firebase* [GitHub](#) **January 2026 – February 2026**

- Built an employee management platform with multi-level approval workflows, role-based access, and real-time messaging.
- Developed and integrated **RESTful APIs** using **JWT**, while designing a seamless frontend-backend data flow for efficient communication.
- Structured a modular and scalable backend architecture using Node.js and MongoDB, and optimized state management for a smooth user experience.

Civic Issue Reporting System | *MERN, Gemini API, GMaps API, Twilio* [GitHub](#) **September 2025 – October 2025**

- Engineered a municipal complaint management system to streamline issue reporting and improve resolution efficiency.
- Merged **text, image, and voice-based submissions** with **automatic GPS tagging** and **AI-generated complaint summaries** for efficient categorization.
- Revamped the **interface experience** to enhance citizen engagement and transparency, **improving efficiency in civic issue resolution by 50%**.

Certifications & Achievements

- MERN Stack with Generative AI – W3grads (Summer Training, 2025)** | [Certificate](#)
- DSA in C++ – S. Technologies (Summer Training, 2025)** | [Certificate](#)
- Postman API Fundamentals – Postman (2025)** | [Certificate](#)
- OCI AI Foundations – Oracle (2025)** | [Certificate](#)
- Computer Networking – Google (2024)** | [Certificate](#)
- Solved **700+ DSA problems** on coding platforms like LeetCode, Codeforces and GFG. codolio.com/profile/CckgJNjF
- Achieved a **LeetCode contest rating of 1600+**, ranking in the **top 23.51% globally**.
- Participated in over 15 hackathons, **winning 3** with impactful solutions that addressed real-world challenges.

Education

Bachelor of Technology in Computer Science **August 2023 – August 2027**
Lovely Professional University, Phagwara *CGPA: 7.9/10*

Class XII (Senior Secondary), RBSE **May 2021 – April 2022**
Sony Academy Sr. Sec. School, Bharatpur *Percentage: 89%*
