SUMMARY

Bachelor of Technology (B.Tech) student in Computer Science with hands-on software development experience in building and delivering end-to-end application features across backend systems and databases. Strong foundation in data structures and algorithms, with experience developing scalable backend services, RESTful APIs, and full-stack applications. Skilled in designing modular systems, integrating third-party APIs, and writing clean, maintainable code. Participated in 15+ hackathons and developed 10+ real-world projects, applying technology to solve practical problems.

TECHNICAL SKILLS

Programming: C++, JavaScript, Java, SQL, Python

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Flutter

Backend: Node.js, Express.js, RESTful APIs, FastAPI

Databases: MongoDB, PostgreSQL

Tools & Cloud: Git, GitHub, Firebase, Docker, Postman, Google Cloud Platform (GCP), AWS (EC2, S3)

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

EXPERIENCE

Curer – Software Developer Intern | *Node.js, SQL, Django, Flutter* Jun 2026 – Present

- Owned the complete development lifecycle of assigned features, from understanding requirements and implementing backend logic to integrating functionality with the mobile application, ensuring seamless performance and a consistent user experience.
- Enhanced application modules by debugging backend and mobile components, improving feature reliability and application stability.
- Collaborated closely with cross-functional teams to analyze feature requirements, participate in code reviews, and deliver production-ready solutions within project timelines.

PROJECTS

Assessment Platform | *React.js, Node.js, MySQL, Docker, Redis* [GitHub](#) Mar 2026 – Jun 2026

- Designed an assessment platform enabling **real-time assessments** and **online monitoring** with interactive dashboards, providing dedicated admin and student interfaces for secure assessment management and progress tracking.
- Implemented secure authentication and **RBAC** using **JWT** and **bcrypt**, while automating user provisioning through single-user creation and bulk **CSV uploads** to streamline administrator onboarding.
- Optimized backend performance through **query tuning** and **Redis caching**, improving scalability and response times.

Employee Leave Management | *MERN, Socket.IO, Firebase* [GitHub](#) Jan 2026 – Feb 2026

- Built an employee management platform with **multi-level approval workflows**, **hierarchical access controls** and streamlining leave request, complaint and reimbursement management across employee, manager and admin dashboards.
- Developed and integrated **RESTful APIs** using **JWT**, while designing a frontend-backend data flow for efficient communication across leave management, complaint handling, reimbursement workflows and team management modules.
- Engineered a scalable backend architecture, enabling real-time messaging and collaboration across role-based portals.

Civic Issue Reporting System | *MERN, Gemini API, GMaps API, Twilio* [GitHub](#) Sep 2025 – Oct 2025

- Created a complaint management system to streamline **issue reporting** and improve **resolution efficiency**.
- Merged **text, image, and voice-based submissions** with **automatic gps tagging**, **Google Vision AI**-powered complaint generation, and smart categorization for accurate reporting and efficient complaint processing.
- Integrated **Google Maps API**, **real-time notifications**, and administrative dashboards to enhance transparency, citizen engagement, and complaint tracking, improving civic issue resolution by **50%**.

ACHIEVEMENTS & CERTIFICATIONS

- 750+ DSA Problems** solved across LeetCode, Codeforces, and GeeksforGeeks – codolio.com/profile/CckgJNjF
- LeetCode Rating: 1650+** (Top **19.73%** globally) – leetcode.com/u/EN11uuIKBm
- Participated in **15+ national and university-level hackathons**, securing **3 wins** by developing innovative software solutions.
- McKinsey Forward Program** – McKinsey (2026) – Certificate
- MERN Stack with Generative AI** – W3grads (Summer Training, 2025) – Certificate
- Postman API Fundamentals** – Postman (2025) – Certificate

EDUCATION

Lovely Professional University, Phagwara, Punjab

Bachelor of Technology in Computer Science and Engineering

Aug 2023 – May 2027

CGPA: 7.9/10
